

A PACIFIC CHARTER INSTITUTE SCHOOL

Mathematics Arts State Standards Grade 5

Fifth grade students add and subtract fractions with unlike denominators. They divide with two-digit divisors and use the four operations with decimals. Students understand volume as an attribute of three-dimensional space. Fifth graders analyze patterns in operations, graph ordered pairs on a coordinate plane, and apply previous understandings of multiplication and division to multiply and divide fractions.

Standards for Mathematical Practice – "HOW" My student can:

explain a math problem,	create & use	a plan to s	olve it, and	check if the
answer makes sense.				

make sense of and flexibly use math symbols, numbers, and operations. use objects, drawings, diagrams, actions and words to explain his/her approach to a math problem and decide if others' strategies make sense.

recognize math in everyday life and use math to solve real problems. use tools (e.g., ruler, concrete models, paper/pencil) to solve problems and deepen understanding.

calculate accurately, use precise math vocabulary, and explain problems/solutions clearly.

describe how numbers and shapes are organized as parts and wholes. notice when calculations are repeated and look for general "rules" and shortcuts.

Math Content Standards – "WHAT" Operations and Algebraic Thinking My student can:

use parentheses, brackets, or braces in numerical expressions. 5.OA.1

write numerical expressions using mathematical symbols and the order of operations. For example, write "add 8 and 7, then multiply by 2" as (8 + 7) x 2. 5.OA.2

express a whole number between 2-50 as a product of its prime factors. OA.2

create patterns using numerical rules in order to form ordered pairs; graph the ordered pairs on a coordinate plane. 5.OA.3

Number Sense and Place Value (Number and Operations in Base Ten) My student can:

Understand the value of digits; recognize that a digit in one place represents 10 times as much as it does in the place to its right and 1/10 of what it represents in the place to its left. 5.NBT.1

	explain patterns when multiplying a number by powers of 10. 5.NBT.2
	explain patterns when a decimal is multiplied or divided by a power of 10. NBT.2
] use whole-number exponents to show powers of 10. 5.NBT.2
	read and write decimals to thousandths using base-ten numerals, number names and expanded form (347.392 = 300 + 40 + 7 + 3/10 + 9/100 + 2/1000). 5.NBT.3
	compare two decimals to the thousandths using <, =, and > symbols to record the comparison. 5.NBT.3
] use place value understanding to round decimals to any place. 5.NBT.4
	easily and quickly multiply multi-digit whole numbers. 5.NBT.5
	divide up to four-digit dividends by two-digit divisors using varied strategies. 5.NBT.6
	illustrate and explain a division problem by using equations, arrays and/or models. 5.NBT.6
	add, subtract, multiply, and divide decimals to hundredths using varied strategies; use concrete models, drawings and writing to explain the method/strategy. 5.NBT.7
Fraction	ıs (Number and Operations)
My stud	lent can:
	add and subtract fractions (including mixed numbers) with unlike denominators. 5.NF.1
	solve word problems that involve addition and subtraction of fractions. NF.2 Juse benchmark fractions and number sense to estimate and assess the reasonableness of answers (e.g., recognize an incorrect result 2/5 + 1/2 = 3/7 by observing that 3/7 < 1/2). 5.NF.2
	understand that fractions are the division of a numerator by the denominator. 5.NF.3
	Junderstand that fractions are the division of a numerator by the denominator. 5.NF.3 J solve word problems involving division of whole numbers that result in answers that are fractions or mixed numbers. 5.NF.3
□ frc	 Junderstand that fractions are the division of a numerator by the denominator. 5.NF.3 Jsolve word problems involving division of whole numbers that result in answers that are fractions or mixed numbers. 5.NF.3 Juse models or a story context to multiply a fraction or a whole number by a fraction. 5.NF.4
	 Junderstand that fractions are the division of a numerator by the denominator. 5.NF.3 Jsolve word problems involving division of whole numbers that result in answers that are fractions or mixed numbers. 5.NF.3 Juse models or a story context to multiply a fraction or a whole number by a fraction. 5.NF.4 Jthink of multiplication as scaling or resizing; compare the size of a product to the size of one factor on the basis of the size of the other factor. 5.NF.5
	 Junderstand that fractions are the division of a numerator by the denominator. 5.NF.3 Jsolve word problems involving division of whole numbers that result in answers that are fractions or mixed numbers. 5.NF.3 Juse models or a story context to multiply a fraction or a whole number by a faction. 5.NF.4 Jthink of multiplication as scaling or resizing; compare the size of a product to the size of one factor on the basis of the size of the other factor. 5.NF.5 Jsolve real world problems by multiplying fractions and mixed numbers using visual models. 5.NF.6
	 Junderstand that fractions are the division of a numerator by the denominator. 5.NF.3 Jsolve word problems involving division of whole numbers that result in answers that are fractions or mixed numbers. 5.NF.3 Juse models or a story context to multiply a fraction or a whole number by a faction. 5.NF.4 Jthink of multiplication as scaling or resizing; compare the size of a product to the size of one factor on the basis of the size of the other factor. 5.NF.5 Jsolve real world problems by multiplying fractions and mixed numbers using visual models. 5.NF.6 Jdivide fractions by whole numbers and whole numbers by fractions using visual models. 5.NF.7

solve real world problems with division of or by fractions using visual models and equations. 5.NF.7

Measurement and Data My

student can:

Convert measurements within the same measuring system (e.g., convert

		~ ~ ~		
5	cm t	0.05) m).	5.MD.I

- use measurement conversions to solve multi-step, real-world problems. 5.MD.1
- make a line plot to display data sets of measurements in fractions. 5.MD.2

use information	on a line plot to	solve problems	s involving fro	action operations.
5.MD.2				

- recognize volume as an attribute of three-dimensional figures. 5.MD.3
- understand concepts related to measuring volume. 5.MD.3
- measure volumes by counting "unit cubes" using cubic centimeters, cubic inches, and cubic feet. 5.MD.4
- solve real world and mathematical problems involving volume. 5.MD.5
- find the volume of rectangular prisms using the formulas $V = I \times w \times h$ and $V = b \times h$. 5.MD.5
- Understand that volume is additive; find the volumes of solid figures composed of two non-overlapping rectangular prisms by adding the volumes of the nonoverlapping parts. 5.MD.5

Geometry

My student can:

understand the meaning of the firs	st and second	number in ar	n ordered p	oair of
coordinates. 5.G.1				

understand	the placement of	the x-axis a	ind the y-a	xis in a co	ordinate pla	ane.
5.G.1						

graph and interpret the coordinate values of points in the first quadrant of a coordinate plane. 5.G.2

represent and solve real-world and mathematical problems by graphing points in the first quadrant of the coordinate plane. 5.G.2

Understand that attributes of a category of two-dimensional shapes also belong to all subcategories of that category. For example, all rectangles have four right angles and squares are rectangles, so all squares have four right angles. 5.G.3

Classify two-dimensional shapes in a hierarchy based on properties. 5.G.4
